## ABOUT ACDELCO

ACDelco® Batteries are available for a comprehensive range of automotive, commercial, transport, marine & other industrial applications. Our commitment to high quality products and excellent customer service has led to ACDelco being one of the most trusted battery brands in the world. To us, standing tall is standing by you.

ACDelco has been associated with premium electrical automotive products for over 100 years. Starting its journey as the Remy Electric Company in 1901, our history and expertise in automotive technology puts ACDelco at the leading edge of the after-market.

With over 90,000 parts across 37 product lines worldwide, our products can be found right around the globe. That's strength in numbers that we continue to grow. If you're interested in making ACDelco your first point of call for all automotive maintenance needs, visit our website [www.acdelco.co.nz](http://www.acdelco.co.nz)

# ACDELCO AGM BATTERY KEY FEATURES

Full Frame stamped grids for positive plates **increases durability by over 65%** and are more corrosion-resistant than other grid designs

Valve-regulated cover design

- Avoids penetration of external oxygen which **reduces oxidation of negative plates** (protects against self-discharge)
- Reduces oxygen escape which **supports oxygen recombination and reduces water consumption**

Reinforced case and enhanced construction material maintains cell-to-cell compression

Negative cell clearance with compression **improves vibration resistance and cyclability**

Electrolyte fully absorbed in glass mat separator (no free acid), **eliminates acid stratification and ensures non-spillable design** to increase safety

## SMF FLOODED RANGE - KEY FEATURES

- Full Frame stamped plate design enables optimal conductivity\*
- Patented high-density active material on all plates
- Built in 'state of charge' hydrometer
- Flame arrestor 'Safety System' on vents
- Factory heat-sealed leak-proof cover
- Patented liquid & gas separators to prevent fluid loss
- Low-resistance micro-porous envelope separators
- Centre-cast on plate strap connectors
- High strength reinforced polypropylene case

## ACDelco Premium

The Premium range Sealed Maintenance Free (SMF) uses a lead-calcium alloy grid to produce a heavy duty stamped Full Frame Technology plate capable of withstanding the most demanding conditions. These high performance Calcium/ Calcium batteries are designed to meet or exceed original equipment (OE) specifications of all new car manufacturers from around the Globe. ACDelco® Commercial batteries are also the right choice for all commercial applications including transport, agricultural and earthmoving industries.

### BATTERY BENEFITS

- Sealed Maintenance-Free design
- ACDelco Full Frame Technology stamped positive plates\*
- Patented high-density active material on plates
- Built in 'State of Charge' hydrometer
- Factory heat-sealed leak-proof cover
- Exclusive patented liquid & gas separators to prevent fluid loss
- Flame arrestor 'Safety System' on vents
- Low-resistance micro-porous envelope separators
- Centre-cast on plate strap connectors
- High strength reinforced polypropylene case

\*Not on commercial size models

## ACDelco AGM

The ACDelco® Absorbed Glass Mat (AGM) range represents the very best in advanced battery technology for the most highly developed luxury cars and most advanced fuel-saving technology, including Stop/Start, regenerative braking, etc.

AGM plate separators reduce internal resistance, providing significant improvement in all performance criteria, including increased cycling ability, faster recharge acceptance and improved cranking power in Partial-State-Of-Charge (PSOC). The AGM range is ideal for highly-advanced start-stop vehicles, high-end luxury vehicles that have higher electrical accessory loads or performance vehicles that require a higher CCA starting battery with improved cyclic ability.

### BATTERY BENEFITS

- ACDelco Full Frame positive & negative plates
- 100% Maintenance-Free
- Thicker positive plates and higher paste density
- Spill and leak-resistant
- Increased cyclic ability & longer service life
- Highest corrosion-resistance
- Highest CCA for Stop/Start applications
- Pressurised internally for vibration resistance
- ACDelco Quality Control manufacturing process
- Suitable for Advanced Stop/Start systems
- Mandatory replacement for cars fitted with AGM batteries as original fit
- Ability to be retro fitted as a 'higher performance' option in high load applications

## ACDelco EFB

ACDelco® Enhanced Flooded Batteries (EFB) represent the most dramatic improvement in flooded SMF battery design since the invention of the sealed maintenance-free battery.

The rapid increase of Stop/Start technology in recent years has placed a far greater demand on car batteries than they were ever designed to cope with. In some parts of the world more than 80% of all new cars sold are now equipped with some form of Stop/Start fuel-saving technology and this number continues to increase.

These batteries combine the latest technology with ACDelco's world-renowned quality to develop a range of batteries which will meet or exceed new car requirements and also deliver significantly longer service life when retro-fitted to older vehicles, both automotive & commercial.

### BATTERY BENEFITS

- ACDelco Full Frame positive & negative plates
- High-density optimised paste mix
- Improved rapid charge acceptance
- Polyester Scrim wraps around plates to prevent shedding
- Higher CCA rating for multiple engine starts on each trip
- Up to twice the service life of a conventional flooded battery
- Significant life improvement in all conventional vehicles (retrofit)
- Mandatory for all Stop/Start equipped cars fitted with EFB batteries
- Ability to be retro fitted as a 'higher performance' option in high load applications

## AUTOMOTIVE

(Starting including Stop/Start)

ACDelco® has a comprehensive range of Maintenance-Free batteries which is comprised of premium quality automotive starting/cranking batteries, available to suit all New Zealand, European, Asian and American vehicles including EFB and AGM for advanced battery management systems.

## MARINE, DEEP-CYCLE, SUV & RV

(HCM Series - Cyclic)

ACDelco HCM Series batteries are designed and tested for use in demanding marine and recreational applications. Accessories like satellite navigation, fridges, communications and many of the necessary creature comforts all place heavier continuous loads on your battery than ever before. They use expanded wrought lead-calcium grids, which are far more durable and stronger than conventional cast type grids and employ greater vibration proofing features. To handle these cyclic requirements they also utilise thicker grids and more active plate material than standard starting batteries. For your convenience, they also come complete with dual marine terminals.

## COMMERCIAL & AGRICULTURAL

(Starting & SP Series HD Commercial)

The heavy duty range of ACDelco Commercial batteries are well-proven in all areas of heavy industry including trucking, public transport (bus), agricultural, mining and earth moving applications. ACDelco Commercial Batteries have been robustly developed to tolerate the ever increasing demands and operating temperatures associated with our harsh commercial working environments. Fit ACDelco Commercial batteries with confidence if reliability and longer service life is your objective.

## MARINE

(M Series - Starting)

This dedicated Marine Starting battery is specifically designed for use in the demanding marine environment. With dual marine terminals and additional anti vibration features to increase durability, these batteries are built to go the distance and not let you down when you need them most. It's really what's inside that makes the difference.

## Battery Safety Warnings & Information

### Corrosive Hazard:

- The product is hazardous according to the definition of WorkSafe New Zealand.
- All relevant safety precautions should be followed.

### Warning

- Keep battery and acid out of reach of children at all times.
- Always store in a safe place, preferably in a plastic tray.
- Keep battery out of direct sunlight, away from any heat sources.
- When charging battery, ensure good ventilation.
- Polypropylene casing can be subject to static electricity (Do not rub casing; wear rubber gloves when handling).
- Batteries are heavy in nature - use correct lifting procedure.
- Do not tilt the battery - this could allow acid to leak out of vents.
- Use baking soda (Soda-Ash) and water to dilute any acid spillage.

### Warning Statements

- Observe the precautionary information on the battery label and the vehicle's operational manual regarding handling and safety requirements of the battery.

### Protective Clothing

- Always wear eye protection and appropriate clothing as a precautionary measure when working with the battery.
- A damp towel covering the battery when handling will minimise some splash and spark dangers.

### First Aid

- Immediately rinse eyes with water or milk if they come into contact with acid mix, then seek medical advice without delay.
- If contact with skin occurs, wash off with water and mild soap at earliest opportunity. Clothes should be washed the same way and rinsed thoroughly.

### Handling Warning

- Naked flames, sparks and smoking are potential ignition sources for explosions when in the vicinity of batteries.
- Avoid shorting any wiring, terminals or spanners when working around the battery, including electrostatic discharge.
- A short circuit has the potential to cause fire or the explosion of the battery, even burns to the operator/ technician.
- Only use a damp cloth with mild soap to clean the battery case, only clean terminals when battery is removed from vehicle and avoid shorting terminals with brush to prevent explosion.

### Corrosive Warning

- The contents of lead-acid batteries are very corrosive. Any direct contact with skin or eyes can result in burns and blindness.
- Protective clothing and safety glasses should be worn when handling to help prevent injury.
- Do not allow electrolyte to escape from the battery casing; it is a hazardous material and should not make contact with ground water or drainage systems, intentionally or otherwise.

### Explosion Danger

- Explosive gases are emitted when batteries are charged or in service; these gases can cause injuries such as burns and blindness.
- Naked flames, sparks and smoking are potential ignition sources for explosions when in the vicinity of batteries.

### Disposal

- Always dispose of scrap batteries at an accredited collection station. Never place batteries with household waste. Do not allow battery electrolyte (acid) to leak. If the casing is damaged, place into a plastic collection tray to contain leaking acid prior to disposal. (Enquire regarding local regulations)
- Damaged and scrap lead-acid batteries may be returned to your ACDelco Battery Distributor or a third party recycler for safe disposal/recycling\*.

### Proper Installation of Battery Vent Hose and Plugs

AGM (Absorbed Glass Mat) and Flooded Lead Acid batteries can produce many potentially dangerous gases. For vehicle applications that have the battery installed inside the vehicle's cabin or rear compartment space, it is imperative the battery be vented properly. For those applications that have a single vent tube, the opposing vent opening on the battery cover must be plugged with a vent hole plug.

For more information on Battery Vent Hose and Plugs, including technical questions, contact your local ACDelco® Battery Distributor/Stockist, or ACDelco New Zealand [acdclco.anz@gm.com](mailto:acdclco.anz@gm.com)

## Battery Replacement Guide

Please ensure extreme care is taken when replacing the battery in your vehicle. Also please make sure the engine, lights and all accessories are turned off before removing old battery. Check if vehicle has a computerised electrical system. Most vehicles with on-board computer systems may require an alternative power source or memory minder to maintain electronic memory when the battery is disconnected\*. Disconnecting the battery on such a vehicle without a memory minder may cause damage to the main computer or other electrical equipment. Ensure replacement battery meets or exceeds minimum capacity and CCA rating for your vehicle.

### Safety First! Do The Right Thing. Always wear appropriate PPE during the replacement procedure.

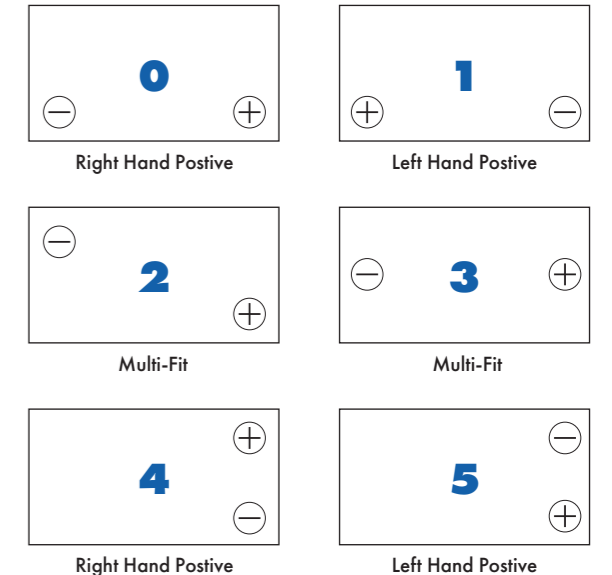

- Lower the driver's window enough to access the ignition keys via window. (A safety measure against total-close central-locking systems)
- Turn off the engine, place into a neutral gear or park position and engage the handbrake.
- Fit memory minder into the cigarette lighter socket or OBD / OBD II port and turn ignition key to the accessory position. NOTE: Radio memory can only be saved if radio is still operating prior to engaging minder.
- It is preferable to perform replacement in a well ventilated environment (To minimise the potential of explosion from hydrogen gas emitted from the faulty battery).
- Remove the negative terminal first, then positive terminal and wrap the terminal securely in a rag to insulate from shorting to ground (This precaution is necessary to avoid potential damage to the wiring and/or electrical systems as a terminal may still be alive).
- Remove the hold-down clamp and carefully remove the battery, taking note of the battery terminal positions, both positive and negative.
- Corroded steel parts should be cleaned and neutralised (use Bi-Carb Soda or terminal cleaning spray), dried and painted.
- Terminals should be thoroughly cleaned.
- Battery cable and starter motor connections should be checked and tightened if necessary.
- If terminal clamps or cables are badly corroded, they should be replaced.
- Clean the battery tray of all debris, stones, etc. to ensure no sharp objects can damage the battery casing.
- Check the height of the replacement battery to ensure there is sufficient bonnet clearance to avoid terminals shorting/ fouling on the closed bonnet.
- If originally fitted to the old battery, remove and refit old vent plugs, adaptors and vent tubes (or replace) to new battery.
- Place the new battery in the tray, ensuring it sits level and that terminal posts are positioned exactly the same as the battery being replaced.
- Replace and tighten hold-downs securely so that the battery cannot move in the tray. Do not over-tighten as this can distort the plastic battery casing. Be sure to check that radiator fan, hoses and drive belts do not make contact with the battery.
- Re-fit cables and tighten terminals (do not over-tighten), ensuring that the negative ground terminal is connected last.
- If a spark occurs during reconnection of the negative terminals, have an auto electrician check for a current drain at your earliest convenience.
- Never hammer terminal connections onto battery posts as this can damage the battery terminals or cause internal damage to the battery.
- Apply a coating of battery terminal protector to the posts and bare cable connections.
- Carefully remove memory minder from cigarette socket or OBD port and start the engine. NOTE: Check that 'Charge Warning' indicator light goes out and the charge gauge (if fitted) shows a normal level.
- Check radio and clock functions to ensure no memory loss has occurred.

\*The above information is a general guide only and is no substitute for the original vehicle manufacturers service repair instructions. Always refer to the original vehicle manufacturers service repair instructions for the correct removal and installation procedures and latest technical information.

## Terminal Types

## Battery Layouts

\*Battery posts, terminals and related accessories contain Lead and Lead components. Its recommended to wash hands thoroughly after handling.

### Disclaimer

Whilst every endeavour is made to ensure all details within this application guide are correct at the time of printing, battery specifications and other specific information are subject to change without notice.

Therefore, we strongly recommend to always check the replacement battery against the existing one to ensure that the battery type, size, capacity and terminal configuration are suitable for the application prior to installation. The content of the ACDelco® Battery Application Guide is provided for information purposes only. No claim is made as to the accuracy or authenticity of the content of this document. ACDelco accept no liability to any person or institution for the information or advice, (or the use of such information or advice), which is provided in the catalogue or incorporated into it by reference.

### Copyright Statement

No part of this publication may be reproduced, stored in any retrieval system or transmitted in any form or by any means, including but not limited to electronic, mechanical, photocopying, recording or otherwise, without prior written permission from ACDelco New Zealand. This includes all texts, illustrations, tables and charts.

## Warranty Information

### Warranty Statement

ACDelco Batteries are warranted throughout New Zealand against faulty workmanship and materials. Depending on the battery and application the amount of time covered varies, refer to the table below for details.

If an ACDelco battery is defective (other than for the warranty exclusions specified below) during that period, we will replace or repair it at our cost. To make a claim please return the battery to the place of purchase, or your nearest ACDelco Battery stockist with your original receipt or another type of proof of purchase.

This voluntary warranty is given by General Motors New Zealand Limited of 2/118 Savill Drive, Mangere East, New Zealand

### Warranty Conditions

This warranty does not cover:

- Normal wear and tear.
- Labour for removal, and replacement of the unit, from the vehicle unless prior written approval has been obtained from ACDelco.
- Batteries that break or fail due to abuse or neglect such as improper installation, misapplication, loose wiring, corroded terminal connections, mishandled or dropped batteries, freezing, fire, explosion, or unauthorised battery modifications.
- Sulphation damage caused by failing to maintain sufficient charge in batteries for extended periods of time. Batteries must be fully charged after any significant drain and the charge cycle must be completed.
- Any consequential or incidental expense or loss if the battery usage that is not for personal, domestic or household use or consumption, in accordance with the Consumer Guarantees Act 1993.

### Warranty FAQ and Answers

**Q:** Will using ACDelco parts void my new vehicle warranty offered by the vehicle manufacturer?

**A:** As ACDelco products are made to exacting standards, their use should not affect your vehicle warranty provided the correct part is used and is correctly fitted. However, if the use of a correctly installed ACDelco battery causes a component failure in your vehicle that is not covered by the manufacturer, ACDelco will, subject to the above Warranty Conditions, cover the cost of repair.

**Q:** The manufacturer of my vehicle has rejected a warranty claim as they are claiming the failure was caused by a faulty ACDelco battery, will ACDelco cover the repairs?

**A:** In the unlikely event that it is determined that an ACDelco battery has led to a component failure in your vehicle ACDelco will cover the cost of the repair, subject to the above Warranty Conditions.

**Q:** How do I make a warranty claim?

**A:** In the first instance contact the place of purchase. Should you require further assistance contact ACDelco via email to [acdelco.anz@gm.com](mailto:acdelco.anz@gm.com)
